PROFILE

Passionate and empathetic UI/UX Designer with a strong foundation in user research and a background in psychology, focused on creating intuitive and user-centered digital experiences. Skilled in wireframing, prototyping, and usability testing through real-world projects. Passionate about solving user problems using design thinking and empathy-driven design.

SKILLS & TOOLS

Design Skills: Wireframing • Prototyping • Usability Testing • Design Systems • Visual Design

Design Tools: Figma • Framer • FigJam • Miro • Canva • Balsamiq Wireframes • Coolors

UI/UX DESIGN PROJECTS

MindCare – Mental Health Support Platform

April 2026

- Designed a user-centered digital platform to support emotional well-being, enabling teens and young adults to access mental health care in a safe, private, and comfortable environment.
- Conducted user research to identify key challenges such as stigma, trust barriers, and accessibility, translating insights into empathetic and user-friendly design solutions.
- Created UX deliverables including user flows, wireframes, and high-fidelity UI for chat, video sessions, mood tracking, and self-care tools.
- Improved user experience by integrating crisis support, community features, and calming visual design, resulting in a more engaging and supportive experience with an estimated 30–40% improvement in user comfort and task completion.

HomySmart – Smart Home Management App

July 2025

- Designed a user-friendly smart home application to simplify device control and automation, enabling users to manage their home environment efficiently with minimal effort.
- Conducted user research to understand challenges in device management, accessibility, and real-time control, translating insights into intuitive and scalable design solutions.
- Created end-to-end UX deliverables including user flows, wireframes, and high-fidelity UI screens for features like AI-based chat control, voice assistance, personalized routines, and mood-based automation.
- Improved usability by integrating seamless onboarding (QR-based setup), room-wise organization, and automation scheduling, reducing user effort and improving task efficiency by approximately 35%.

QuickCare – On-Demand Doctor Consultation App

April 2025

- Designed a user-centered mobile application to simplify access to non-emergency medical care, reducing unnecessary hospital visits and improving convenience for users.
 - Conducted user research and defined pain points such as long waiting times, repeated medical history sharing, and lack of real-time doctor tracking, translating insights into effective design solutions.
 - Created end-to-end UX deliverables including user flows, wireframes, and high-fidelity UI screens, focusing on seamless appointment booking, home visit scheduling, and digital health record management.
 - Enhanced user experience by introducing real-time doctor tracking, follow-up continuity, and intuitive navigation, reducing user effort and wait-time frustration by approximately 40%.
-

WORK EXPERIENCE

Amtex Systems | Tele-Counselor

Provided emotional support and guidance to women and elderly People through government-supported counseling services. Strengthened communication, active listening, and empathy skills, contributing to the ability to design user-centered and meaningful digital experiences.

Senior Citizen Counselling Services	– 5 Months	Dec 2023
Women's Support Counselling Services	– 1 Year	Aug 2022

EDUCATION

M.Sc. Psychology - Alagappa University	2019 – 2021
PG Diploma in Counselling and Psychotherapy - Lady Doak College	2018 – 2019
B.Sc. Mathematics with Computer Applications - Lady Doak College	2013 – 2016

CERTIFICATION

UI/UX Design Certification - GUVI | 2025
